

Learning Objectives:

- Understand what Artificial Intelligence (AI) is, and isn't, in everyday terms
- Provide examples of AI in everyday life
- Explain what Large Language Models (LLMs) are and how they work
- Explain Hallucinations and Bias in AI and why they happen
- Provide examples of Hallucinations and Bias in AI

Handouts:

- [Slides](#): the slides cover the content and are meant to aid instruction
 - Slide numbers on this guide are indicated in [brackets]
- [Pre- & Post- Survey Questions](#): you may use these to track participant outcomes
- Handouts
 - [Intro to AI/AI in Your Daily Life](#): 2-pg, Handout for participants to take with them after the lesson. Covers what is AI, common myths, examples of AI in daily life
 - [Intro to LLMs](#): 2-pg, Handout for participants to take with them after the lesson. Covers LLMs, hallucinations, bias in AI, and examples of LLMs

Lesson Plan:

Total Time: 45-60 min., depending on instructor pace and participant comfort

- Introduce the lesson and today's learning objectives (2 min.)
- (Optional) Conduct Pre-workshop survey (5 min.)
- [3-6] Explain What is AI? and AI in Your Daily Life (10 min.)
 - Pass out "[Intro to AI/AI in Your Daily Life](#)" handout
- [7-8] Explain What are LLMs? (5 min.)
 - Pass out "[Intro to LLMs](#)" handout
- [9] Instructor-led demo of an LLM with attendee participation (5 min.)
- [10-12] Explain black box concept and hallucinations (10 min.)
- [13] Instructor-led demo of Hallucination or walk through example on deck (2-5 min.)
- [14-15] Explain Bias in AI (2 min.)
- [16-18] Wrap-up lesson (5 min.)
- (Optional) Conduct Post-workshop survey (5 min.)
